

Mailchimp & Mailjet Integration

We've introduced support for integrating **Mailchimp** and **Mailjet** accounts to enhance email delivery capabilities.

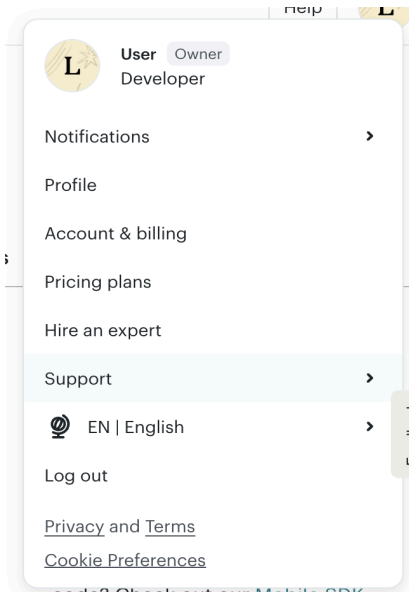

Mailchimp

1. Signup / Login

- Go to: <https://mailchimp.com>
 - Click **Sign Up Free** → create account
 - Or click **Log In** if you already have one or a login to a paid subscription
-

2. Get API Key (Secret Key)

- **After login** → **Click Profile icon (top right)**
- **Go to Account & Billing**

- **Open Extras** → **API Keys**

Custom Website

Remaining Sends reset on Apr 13

- **Click Create A Key**

Copy New API Key

You won't be able to see or copy this API key again. Save it somewhere secure, or use it to connect your application right away.

Note: If you lose this key, you'll need to generate a new key and update any integration that uses it.

Your Key

*****-us15

[Copy To Clipboard](#)

- **Copy the generated API key**

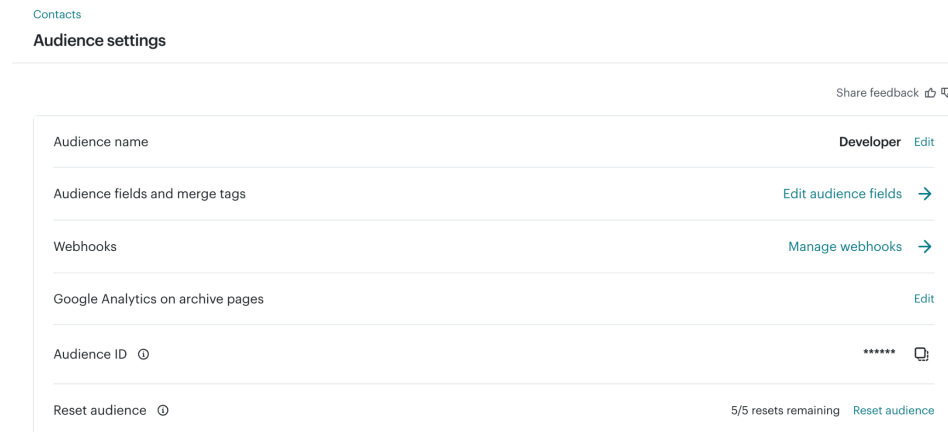

3. Steps to Get Audience ID in Mailchimp

If Audience already exists:

- **Click Audience (left sidebar)**
- **Go to Settings**

- **Click Audience name and defaults**
- **Scroll to the bottom of the page**
- **Locate Audience ID (List ID)**

If NO Audience exists:

- **Click Audience (left sidebar)**
- **Click Create Audience (or Create List)**
- **Fill in the required details:**
 - **Audience name**
 - **From email address**
 - **From name**
 - **Address**
 - **Reminder message**
- **Click Save**

Then follow again:

- **Go to Audience → Settings**
 - **Click Audience name and defaults**
 - **Scroll down**
 - **Get Audience ID (List ID)**
-

Mailchimp API Key

Use the below given API key for Mailchimp authentication

Mailchimp Settings

API Server

Audience ID

[Save Settings](#)

Mailchimp Configuration Details (Contactboss)

- **API Key**
The API key is obtained from Mailchimp (refer to Step 2).
- **API Server (Data Center)**
The API server is derived from the API key.
Example:

*****-us15

Here, the last part **us15** is the API server.

- **Audience ID**
The Audience ID is obtained from Mailchimp (refer to Step 3).
-
-

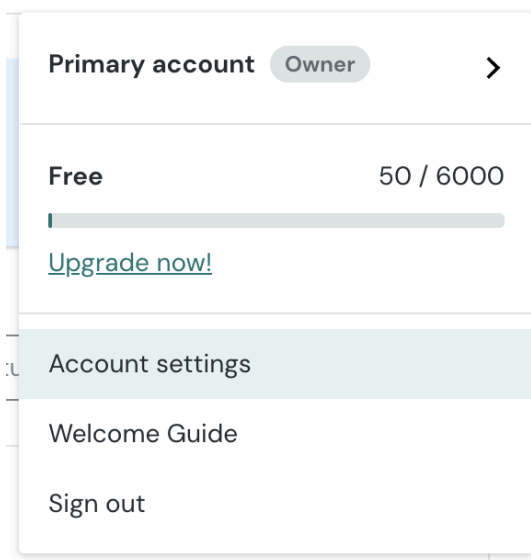

Mailjet

Step 1: Signup / Login

1. Go to <https://www.mailjet.com>
 2. Click Sign Up → create account
OR
Click Log In if already registered
-

Step 2: Get API Key & Secret Key

1. After login → Click Profile / Account

2. Go to Account Settings
3. Click SMTP & API

You will see:

- API Key (Public Key)
- Secret Key (Private Key)

Example:

API Key : abcd1234
Secret Key : xyz98765

Credentials (API and SMTP)

Primary API Key	API Key	Secret Key
Main account	dbe7***** 	* * * * *

[See all API credentials](#)

Step 3: Add & Verify Sender

1. Go to Sender Addresses & Domains

Account Information

Senders and Domains Manage your domain and sender settings 	Account settings Enable tracking, display options in your dashboard & reports. 
Add a domain or sender address	Account settings
Setup SPF/DKIM authentication	Tracking settings
Setup a Page Domain	Account sharing
SMTP and SEND API settings	Two-factor authentication
	SAML Auth (SSO)

2. Click Add Sender
 3. Enter:
 - Email address OR domain
 4. Verify:
 - Email verification (quick) OR
 - Domain (DNS verification - recommended)
-

Step 4: Use in Contactboss

- API Key
- Secret Key
